Aratubo Policy

In order to satisfy the commitments to our clients, the applicable legal and regulatory requirements and the objectives set by the company, ARATUBO S.A., a company dedicated to the manufacture of precision welded steel tubes, understands that CONTINUOUS IMPROVEMENT is a basic principle that must govern all its actions.

This implies:

- Concentrating our efforts only on actions that add value.
- Correct performance on the first attempt, working with the objective of zero defects.
- Complying with customer requirements, as well as all legal requirements and other voluntary requirements associated with environmental and health and safety matters.
- Establishing, reviewing and updating the organisation's objectives.
- Preventing any harm or damage to the health of the people associated with our business.
- Improving our performance in terms of safety and the environment.
- Preventing any environmental impact from our activity.
- Making a responsible use of natural resources.
- Establishing the necessary measures to minimise the generation of waste, promoting its valorisation and recycling.

Acting in this way increases our competitiveness and consequently strengthens our future as a company.

People are the cornerstone in the ARATUBO operation, and their motivation and involvement in this project is a critical objective.

We adopt the ISO 9001, IATF 16949, ISO 14001 and OHSAS 18001 Standards, in their respective current versions, as tools for the continuous improvement of our processes.

In order to carry out this project, we will promote training in QUALITY, SAFETY and THE ENVIRONMENT for all Aratubo S.A. personnel.

The success of this project relies on the personal commitment of each and every one of us.
